

# Session 5: EMERGENCY RESPONSE PROCEDURE

Date: 04 September 2020

Prepared by: wael Mohamed MFD

No. of Slides:

# EMERGENCY RESPONSE PROCEDURE

# EMERGENCY RESPONSE PROCEDURE

## Emergency Response

Emergency response planning is an element of the Safety Policy and Objectives component of the SMS framework. An emergency (or crisis) response plan is based upon an assessment of risk appropriate to the size and type of operations, and includes consideration of a major aircraft accident and other potential aircraft and/or non-aircraft events that would require a full corporate emergency response.

Emergency Response Plan for airline is key, incase the airline is involved in an accident, serious incident, investigation or lawsuits. ERP provides specific step for the airline or airport to take after an accident has occurred to protect the airline or airport from liabilities.

# FLIGHT DISPATCH SHIFT SUPERVISOR CHECKLIST

## FLIGHT DISPATCH EMERGENCY RESPONSE ACTION

- 1- Keep a comprehensive daily log of your activities in order to provide the Emergency Director with a summary report.
- 2- On becoming aware of an aircraft incident or accident, send a copy of brief package for the flight involved and the previous flight to [hala.azam@gulfair.com](mailto:hala.azam@gulfair.com)
- 3- Provide a copy of all available documents and notes connected with the flight and previous flight, to [hala.azam@gulfair.com](mailto:hala.azam@gulfair.com) such as:
  - Weather maps
  - Weather reports and weather briefing notes
  - Weather records
  - ATS Flight Plan
  - NOTAMs
  - Handwritten notes (if available)
  - Fuel figures and calculation notes (if available)
  - Route and approach charts and manuals (Jeppesen)
  - Any other relevant documents pertaining to the flight
- 4- Request the Flight Dispatchers involved in the preparation of the Flight for a written report of any relevant information related to the accident/ incident flight, and send it to [hala.azam@gulfair.com](mailto:hala.azam@gulfair.com).
- 5- Continue to update information for the Emergency Director and CMC as required.

# Business Continuity Recovery Plan Procedure

# Business Continuity Recovery Plan Procedure

## Overview

Flight Dispatch role within airline business is more critical and must be operated all times. Flight Dispatch facility may be evacuated and relocated to alternate facility due to fire, bomb threat, loss of power, IT Network failure or any security/safety related threat etc. Major system failure or connectivity issues which could be resolved by relocation (e.g. fibre-optic cables cut rendering operational systems inoperative).

In the event of notice to evacuate or the potential of evacuation, Shift Supervisor Flight Dispatch will establish the estimated length of time before normal operations are likely to resume and assess the benefit of establishing a 'skeleton' staff to make their way to the alternate location. If information is received and verified that normal operations are not likely to be reestablished, a decision will be made to relocate all operations to the alternate location.

When the decision has been made to relocate, the relevant Senior Flight Dispatcher or delegate will ensure all relevant checklists are complete.

The BC document is intended to serve as the centralised repository for Business Continuity information, tasks and procedures that will facilitate timely response to a disaster that interferes with the critical business processes and IT systems and amongst others, may threaten the life and safety of employees.

# Business Continuity Recovery Plan Procedure

## **Purpose**

The handling of critical business process in the event of unforeseen disaster. This procedure provide the guidelines to identify, act and relocate to an alternate facility or DR site when disaster occurs. This will enable Flight Dispatch to continue provide Flight Dispatch services, weather's analysis, NOTAM and continue business processes.

## **Scope**

The scope of this document is to draft, review, approve and update the plan and controls/processes related to the timely recovery of critical functional process in case of a disaster.

The critical processes in scope for this plan are the following:

- Flight Planning

- Flight Monitoring – EDTO flights

- Pre-flight Package

# FLIGHT DISPATCH SHIFT SUPERVISOR CHECKLIST

## Recovery Plan

Upon declaration of the disaster, the SFD will brief MFD or his deputy to determine if and when functions of the Flight Dispatch will be relocated to an alternate location or DR Site. MFD or his deputy will issue verbal instruction of the Flight Dispatch Business Continuity plan to ssfd. If any clarification is required.

Initial advice will be distributed to key stakeholders by the MFD or his deputy with advice of the relocation

In the event that an 'alternate facility' is required to accommodate the occupants of the Flight Dispatch and their associated activities, MFD will source a location either externally or within a Gulf Air property (Gulf Air Club) to ensure continuity of operations. An external location may include a suitable hotel / conference facility within Muharraq or elsewhere as is deemed necessary and appropriate.

MFD or his deputy will assigned/nominate skeleton Flight Dispatch Staff to move to alternative facility.

# FLIGHT DISPATCH SHIFT SUPERVISOR CHECKLIST

## **Recovery Plan**

Once contingency plan has been put in place to ensure connectivity and communications remain, with Business Continuity protocols initiated between IT and Business Continuity and Operations Resilience within Gulf Air Network Operations shall be sent via email by MFD or his deputy.

SFD will be instructed to depart to continue operations at the alternate location.

When the decision has been made to relocate, the SSFD will send an email to network-wide to email address groups [Airport.Managers@gulfair.com](mailto:Airport.Managers@gulfair.com) [Duty.Manager@gulfair.com](mailto:Duty.Manager@gulfair.com) informing activation of alternative Flight Dispatch facility.

IT shall configure above email group addresses for Flight Dispatch.

Once you reached IT Disaster Recovery (DR) Site at Gulf Air Club, please register your attendance through biometric attendance system which is located at the entrance of the Club.

(Refer to full Business Continuity Recovery Plan Procedure located on shear point)

Thank you.
