

Flight Dispatcher Assessment Preparation Guide

Focused on the shared assessment format and heavily referenced to the Flight Dispatch Manual & Procedures in **mfs2 flightplanning User Manual_V01.04.pdf**.

Target profile: around 1 year experience.

Assessment format

- Part A: Multiple-choice written exam
- Part B: One-page written assignment
- Subjects: Applied mathematics, physics fundamentals, chemistry (fuels/gases), meteorology, logical/analytical reasoning, general aviation awareness

Dispatcher task flow (manual-based)

- FDP-01: Shift handover (weather, NOTAM, MEL/CDL, system status).
- FDP-10: Input sheet preparation (STD / N-STD / ETOPS).
- FDP-11: OFP preparation and checks (minima, route, fuel, alternates, remarks).
- FDP-12: ATS filing, delay/cancel/refile logic, call-sign conflict handling.
- FDP-14/FDP-15/FDP-16: Tankering, payload penalties, MEL/CDL impact control.
- FDP-20: Monitor warnings (LOADCHG/MET/NOTAM/STD) and recalculate/re-file as needed.

Expanded Multiple-Choice Question Bank

Choose one best answer for each question.

1. In dispatch planning, the OFP must primarily be:
 - A) Fast and minimal
 - B) Safe, legal, economical
 - C) Short and generic
 - D) Pilot-written only
2. During handover, which item is mandatory to brief?
 - A) Cafeteria menu
 - B) Personal leave plans
 - C) NOTAM and weather changes
 - D) Office seating
3. If destination weather is below minima near ETD, dispatcher should first:
 - A) Ignore if fuel is high
 - B) Reassess alternates/minima and replan
 - C) Cancel ATS immediately always
 - D) Wait with no action
4. ATS flight plan data should be based on:
 - A) Previous day's plan
 - B) OFP data for that flight
 - C) Pilot memory
 - D) Airport rumor
5. A LOADCHG warning in mfs2 normally requires:
 - A) No action
 - B) Recalculate OFP and coordinate update
 - C) Shut system down
 - D) Delete flight
6. Which best describes MEL purpose?
 - A) Ground all aircraft
 - B) Allow operation under defined conditions
 - C) Replace AFM
 - D) Only for pilots
7. RNP routes with RNP equipment degraded under MEL require:
 - A) No review
 - B) Route/level compliance checks and remarks
 - C) Cabin crew approval
 - D) Only fuel change

8. When en-route weather shows severe TS/CB, dispatcher should:

- A) Keep shortest route only
- B) Analyze SIGWX and reroute if needed
- C) Ignore until landing
- D) Remove alternate

9. Tankering should be applied when:

- A) Always
- B) Only if operationally feasible and beneficial
- C) Never
- D) Only on empty flights

10. Payload restriction management starts with:

- A) Post-flight report only
- B) Early detection of limiting factors
- C) Ticketing changes only
- D) Adding random fuel

11. If NOTAM closes destination after departure, dispatcher should:

- A) Do nothing
- B) Coordinate with crew/IOC for continue or divert
- C) Turn off ACARS
- D) Cancel all flights

12. The key objective of FDP-11 is:

- A) Cabin service planning
- B) Accurate compliant OFP release
- C) Marketing updates
- D) Roster swaps

13. Which is most important for a 1-year dispatcher in exam answers?

- A) Complex jargon
- B) Clear safe/legal logic
- C) Longest sentence
- D) Guessing

14. Applied math in dispatch is often used for:

- A) Logo design
- B) Fuel/time/speed calculations
- C) Crew uniforms
- D) Catering quotes

15. Physics relevance to dispatch includes:

- A) Color theory

- B) Performance effects of temperature/altitude
 - C) Keyboard shortcuts
 - D) Passenger seating only
16. Chemistry basics help with understanding:
- A) Fuel behavior and gases/pressurization
 - B) Airport architecture
 - C) Tax policy
 - D) Luggage colors
17. Meteorology fundamentals support:
- A) Safer routing and minima decisions
 - B) Payroll approvals
 - C) Hiring decisions
 - D) IT procurement
18. In logical reasoning questions, best method is:
- A) Pick longest option
 - B) Use constraints and eliminate contradictions
 - C) Always choose C
 - D) Skip data
19. If interface data is missing in planning system, dispatcher should:
- A) Leave blank
 - B) Cross-check source and enter correctly
 - C) Cancel whole schedule
 - D) Use random values
20. When call sign conflict risk exists in Gulf sectors, dispatcher may:
- A) Ignore ATC
 - B) Use approved suffix strategy for ATC use
 - C) Change aircraft type
 - D) Delete leg
21. ETOPS awareness for dispatch includes:
- A) Only departure weather
 - B) Diversion and en-route alternate readiness
 - C) Cabin meal timing
 - D) Baggage priority
22. A professional one-page assignment should be:
- A) Story-like and vague
 - B) Structured: situation, risks, analysis, decision, coordination
 - C) One paragraph only

D) Mostly abbreviations

23. If MEL penalty significantly affects payload, dispatcher should:

A) Hide the impact

B) Coordinate with performance/load control/IOC

C) Ignore load

D) Delay all flights globally

24. Which is the best dispatch mindset?

A) On-time at any cost

B) Safety and compliance first

C) Cost only

D) Automation only

25. A revised OFP with route change may require ATS action:

A) Never

B) Cancel/refile or update as applicable

C) Only next day

D) Only by crew

26. In minima assessment, dispatcher should consider:

A) Only destination

B) Origin/destination/alternates time window

C) Only sunrise

D) Only runway length

27. General aviation awareness for exam likely includes:

A) ICAO/ATS basics and roles

B) Aircraft painting

C) In-flight movies

D) Retail sales

28. When destination alternate becomes unavailable, dispatcher should:

A) Proceed unchanged

B) Select suitable replacement and re-evaluate fuel

C) Delete NOTAM

D) Lower all minima

29. A good answer under pressure is:

A) Fast but unsupported

B) Short, logical, and reference-based

C) Highly emotional

D) Copied text

30. For storm-related disruption, coordination priority is:

- A) Social media first
- B) Crew/IOC/ATC operational channels
- C) Passengers directly by dispatcher
- D) No communication

31. If airport weather warning exceeds aircraft limits, dispatcher should:

- A) Assume crew can manage
- B) Apply aircraft limits and adjust planning
- C) Ignore in daytime
- D) Only call maintenance

32. Record retention in dispatch is important for:

- A) Decoration
- B) Compliance and investigation support
- C) Reducing fuel burn
- D) Advertising

33. Best way to improve MCQ score quickly:

- A) Memorize random facts
- B) Practice mixed scenario questions daily
- C) Skip weak subjects
- D) Study only one topic

34. In assignment writing, decision justification should link to:

- A) Personal preference
- B) Manual/regulatory and operational facts
- C) Internet comments
- D) Guesses

35. A dispatcher should escalate when:

- A) There is operational uncertainty with safety impact
- B) Everything is normal
- C) Roster is full
- D) Printer works

36. Most defensible final dispatch decision is one that is:

- A) Cheapest
- B) Documented, coordinated, and compliant
- C) Fastest
- D) Unquestioned

Answer Key

1-B | 2-C | 3-B | 4-B | 5-B | 6-B | 7-B | 8-B | 9-B | 10-B | 11-B | 12-B

13-B | 14-B | 15-B | 16-A | 17-A | 18-B | 19-B | 20-B | 21-B | 22-B | 23-B | 24-B

25-B | 26-B | 27-A | 28-B | 29-B | 30-B | 31-B | 32-B | 33-B | 34-B | 35-A | 36-B

One-page assignment template (exam day use)

- 1) Situation summary (2–3 lines).
- 2) Risk identification (weather, minima, MEL, route, fuel, payload).
- 3) Analysis steps performed (what checked and why).
- 4) Decision and justification (safe + legal + economical).
- 5) Coordination actions (crew, IOC, load control, maintenance, ATC).
- 6) Contingency and monitoring plan.

Primary reference emphasis: mfs2 flightplanning User Manual_V01.04 (FDP-01, 05, 10, 11, 12, 14, 15, 16, 20).
